COMMISSION
DOCKET CONTROL

Dear People,

I support increasing energy efficiency programs in the proposed settlement for the APS rate case.

This will result in energy efficiency savings that will represent 3.75% of the APS retail load by the end of 2012. This will help reduce emissions of carbon dioxide and other pollutants and help lower electric bills, even though it will result in a higher electric rate.

By increasing energy efficiency and reducing energy consumption, customers can reduce their energy bills by 10-50%, even if the cost of the customer programs increases electric rates by 1-2%.

Please refer to Docket Numbers E-00000J-08-0314, G-00000C-08-0314 for the open docket on energy efficiency and E-01345A-08-0172 for the APS rate case

Thank you,

James H. Wilkey
